Wonder Cleaning

At İlhanlar Kimya, we operate with a deep understanding of the value that cleanliness and hygiene add to the quality of life. Operating in the cleaning products sector under the Wonder Cleaning brand, our company also provides solutions for cosmetics, industrial maintenance, and protection. Our modern facility adheres to GMP (Good Manufacturing Practices) standards, allowing us to offer reliable solutions backed by international quality certifications and a professional approach to production. We are proud to contribute to our country's economy through our domestic production capabilities and modern facilities.

Professional Solutions

Under our Wonder Cleaning brand, we specialize in producing dishwashing detergent, dishwasher rinse aid, glass cleaner, laundry detergent, bleach, fabric softener, foam soap, air freshener, liquid soap, degreaser, and surface cleaner.

Our products are used in hotels, restaurants, cafes, hospitals, schools, shopping centers, and workplaces, as well as in homes. We provide services with Wonder Cleaning quality in all areas where cleaning and hygiene are paramount, from industrial facilities to gyms, and from large enterprises to small businesses.

At Wonder Cleaning, we serve all of Turkey with a professional sales team of 110 individuals, comprised of 65 corporate sales representatives and 45 active field personnel. We are committed to delivering our high-quality cleaning and hygiene solutions to every corner of the country, leveraging our experienced sales network and robust distribution infrastructure. With our modern production facility, expert R&D team, and strong field force, we are a trusted solution partner in the industry.

Scientific Approach

Our R&D team, led by three chemical engineers, constantly strives to develop more effective and environmentally friendly formulas. Innovation and customer satisfaction are our foremost priorities.

Innovation Quality

01

Premium Quality & Raw Materials

All products manufactured under our Wonder Cleaning brand are formulated using premium quality raw materials. Our imported raw materials are processed with advanced technology systems in our modern facility, which adheres to GMP and ISO standards. We deliver maximum performance by manufacturing our products to standards that exceed TSE requirements.

02

Special Formulation & Technology

Our proprietary formulas, integrated into our products, have been specifically developed to ensure high performance and long-lasting efficacy. Utilizing glycerin, vitamins, natural oils, and specialized active ingredients in the formulation of our products, we provide not only thorough cleaning but also essential protection and care. Through our advanced perfume technology, we deliver enduring freshness.

03

Research & Development

Our R&D team is dedicated to achieving the highest quality and maximum performance in every product. Utilizing premium-grade raw materials and advanced production systems, we consistently develop the highest quality products in the industry.

Laboratory & Production Assurance

Modern Laboratory Systems

İlhanlar Kimya's modern laboratories maintain strict control over all processes, from production to dispatch. Within our R&D laboratory, the formulation of each product undergoes meticulous development and rigorous testing. Quality control tests are performed at every stage, from raw material intake to the final product. Product durability tests are conducted in our specially designed stability chambers, guaranteeing their efficacy throughout their shelf life.

Sterile Production & Hygiene

We utilize specialized sterilization systems in our production facility to prevent the formation of microorganisms. We ensure maximum product safety through our pure water systems, HEPA filters, and sterile production areas. Product safety is guaranteed by conducting regular microbiological analyses for every production batch.

Advanced Technology & GMP Standards

In our production facility, which adheres to GMP standards, specially designed equipment and advanced technology are employed to prevent cross-contamination. Our production areas, equipped with cleanroom technology, maintain the highest hygiene standards.

Our Quality Certifications

01

GMP (Good Manufacturing Practices) Standards

We ensure the highest quality standards at every stage of our production processes, guaranteeing product safety. With our GMP certificate, we certify that our production adheres to international standards.

02

ISO 9001 Quality Management System

Through our quality management system, we continuously monitor and enhance all processes, from production to shipment. We secure our customer satisfaction-oriented management approach through ISO 9001 standards.

03

ISO 14001 Environmental Management System

We conduct environmentally responsible production through our eco-friendly processes and robust waste management system. Our ISO 14001 certification demonstrates our commitment to environmental responsibility.

04

ISO 45001 Occupational Health and Safety System

The health and safety of our employees are paramount. We manage our occupational safety system in accordance with international standards, as evidenced by our ISO 45001 certification.

05

Vegan Certification

We refrain from using animal-derived ingredients in our products, ensuring environmentally conscious production. Our Vegan certification formally attests to our dedication to ethical production practices.

WONDER
CLEANING

A wide-angle, low-perspective shot of a modern office hallway. The ceiling is a complex, white, grid-like structure with recessed lighting. The floor is a highly reflective, light-colored material, possibly polished concrete or stone, showing clear reflections of the ceiling and windows. On the left, there are large windows with black frames, and a potted plant sits on the floor near them. On the right, there are glass-walled offices or meeting rooms with blue horizontal stripes. The hallway leads into the distance, creating a sense of depth.

Surface Cleaner

Surfaces are the most crucial elements forming the initial impression of a space. Shiny and clean floors are an indispensable indicator of professionalism and hygienic environments. Correct product selection and effective cleaning are paramount in this regard.

Pro Technology Surface Cleaner

Our surface cleaner, developed with an advanced technology formula, makes a significant difference in professional cleaning.

- Dust-repellent Pro Technology formula
- Surfaces that remain clean for an extended period
- Special acid-free formulation
- Marble and ceramic friendly
- Water-repellent property
- Long-lasting freshness with Blue Ice fragrance
- Shining effect
- Foam-free, effective cleaning

Areas of Use

In every area where hygiene and cleanliness are important, it is safely used, from hospitals to hotels, from educational institutions to industrial facilities, and from offices to homes.

CLEANING

Other Products

Industrial Dishwasher Detergent

RINSEPERFECT Industrial Dishwasher Detergent, with its powerful formula developed using 3D Rinse Aid Technology, effectively removes even the most stubborn food residues and greases. Its special formulation ensures hygienic cleaning for your dishes, leaving no stains or residue. Its high-performance formula delivers excellent results in professional dishwashers.

Industrial Dishwasher Lime Remover

CALCISOLVE Lime Remover, with its specialized formula, powerfully dissolves lime and mineral deposits that accumulate in industrial dishwashers. Developed with LIMESCALE Technology, our product protects your machine's heating and spraying systems, thereby maximizing its performance. This effective lime remover extends machine life and optimizes energy consumption.

Multi-Purpose General Cleaner

EveryClean Multi-Purpose General Cleaner, developed with QUANTUMCLEAN Technology, ensures maximum cleanliness and hygiene on all surfaces thanks to its superior formulation. With its powerful degreasing action and quick-drying property, it effortlessly cleans even the most stubborn dirt without leaving streaks or residue on surfaces. It is an innovative cleaning product that can be safely used on all types of surfaces due to its unique formula.

Shiny Surface Cleaner & Protector

LUSTERCLEAN, developed with CRYSTAL SHIELD TECHNOLOGY, is an innovative solution that delivers maximum cleanliness and protection on glossy surfaces. It is safely used on marble and ceramic surfaces due to its special acid-free formula. Its water-repellent properties and rapid drying provide effective, streak-free cleaning, while its non-abrasive composition ensures long-lasting shine and protection for surfaces.

Lime Remover

LIMEPOWER Lime Remover, formulated with ANTISCALE Technology, effectively dissolves lime and mineral deposits on ceramic, metal, and enamel surfaces. Its specialized formulation effortlessly cleans even the most stubborn lime layers and can be safely used on delicate surfaces. Ensures hygienic and brilliant results on surfaces without leaving any residue.

Dirt and Wax Remover

INTENSOLVE Dirt and Wax Remover, featuring an ammonia-based formula developed with Deep-Clean X Technology, effectively eliminates stubborn dirt layers and wax from floors. Its unique formulation penetrates hard surfaces, providing a deep clean for stubborn dirt and stains. It exhibits maximum efficacy even on the most challenging dirt, such as oil stains found in industrial facilities and workplaces. Suitable for diluted application, it can be safely used on hard floors.

Oven Grease Remover

Developed with THERMOFORCE Technology, THERMOXIN Oven Grease Remover deeply cleans even the most stubborn grease and grime in your oven, thanks to its powerful formula. Its unique composition ensures effective cleaning, effortlessly dissolving burnt grease and food residues. It delivers excellent results with a formula that can be safely used on oven surfaces.

Burnt Oil Cleaner

THERMOCLEAN Burnt Grease Cleaner, featuring a powerful alkali-based formula developed with ULTRA-SOLVE Technology, effectively dissolves carbonized and burnt grease residues in professional kitchens. Thanks to its special formulation, even the most stubborn dirt can be easily removed when applied via boiling or immersion methods. Its formula, safe for use on stainless steel surfaces, delivers excellent results with its easy-rinsing properties.

Fruit and Vegetable Cleaning Solution

Developed with PROPURE Technology, the FoodFresh Vegetable and Fruit Cleaning Solution, through its advanced formulation, thoroughly purifies vegetables and fruits from dirt, bacteria, and pesticide residues. While ensuring maximum hygiene for foods with its innovative composition, its easy-to-rinse nature expedites kitchen operations. Our product, reliably chosen by professional kitchens, offers an effective and practical cleaning solution.
